

Markets saw buying again yesterday and now FII's net plus 9735 contracts and yesterday they have bought approx 100000 contracts.

**Nifty is above 20 SMA**

Short term trend will become buy after 18265 if there is buying today also then the buy trend is confirmed and data is plus figures.

Yesterday USA S&P 500 gave strong buying , US S&P has risen 130 points from low

Also pro data were buyers so they might come for selling today to square off.

For 24<sup>th</sup> Jan markets are opening gap up so we may see 2 scenarios, profit booking at higher levels or if buy above 18265 then more longs can be created, if the market breaks yesterdays low then again we will go range low of 17750

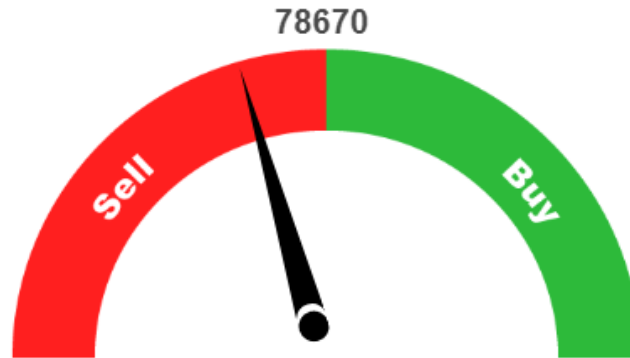

Markets again looks to be in range of 18200 to 17750

Pro data heavy bullish sentiment USA at range high shows we might profit booking in the markets
